- Air/hydraulic brakes
- LED work and road lights
- Max loading height = 5000mm
- Wheels 600/55 R26.5 10 STUD with FLR339 BKT
- Auto lube on conveyor side chains
- Weight approx 11000kg

## MAXILODE Built for business... high capacity maize loading

The Niagri Maxilode maize loader is a heavy duty, high output loader for maize. Driven by a self contained John Deere engine or the option to run from tractor PTO.

Designed to transfer crops from field trailers to bulkers at the field side. Loading at the field saves on unnecessary logistics, and prevents mud and debris on the road.

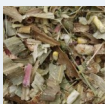

The machine is built for business, with a heavy duty construction. Hydraulically foldable unit for quick and easy movement. The levelling door controls the height of the product to maintain a constant flow through the machine. Hydraulic levelling jacks facilitate unlevel ground.

The machine folds up in minutes ready for transport and features a LED lighting system.

Machines manufactured to order.

Specifications to suit customer requirements.

**This machine is suitable for the following crops:**

Maize
