- Water can be recycled
- Better finish than barrel type washer
- Manufactured to your output requirements
- Painted mild steel or 304 grade stainless steel construction

Fast gentle washing for a range of root crops

An alternative to barrel washers, a more aggressive wash for hardy vegetables. The Niagri Brush Washer cleans a wide range of root crops in a continuous and speedy process.

Mindful of eliminating damage to crops, this design incorporates a hydraulically operated table to control the cleaning time and speed.

Manufactured to an extremely high standard to withstand continuous use in carrot and parsnip production. The speed of the top and bottom brushes can be also be adjusted independently to control the finish
