

CARROT CUTTER

FEATURES

- Fully automatic cutting of carrots
- No need to align carrots
- Output: 1 ½ - 3tph (product dependant)
- Water consumption: 60ltr/min @ 5 bar
- Maximum carrot diameter: 70mm
- Maximum carrot length 360mm
- In feed & out feed solutions also available

Fast, accurate & versatile

The Carro-cut automatically cuts segments of carrots to a pre-defined length or trims the tops and tails, whichever is required.

Financial Benefits

Cutting carrots automatically gives obvious financial benefits over manual labour. It is also quicker and much more accurate.

No need to align the carrots, top or tail end makes no difference to efficiency. Set the blades to the required depths, start the machine and let it do the work.

Outputs from 1.5 - 3tph, dependant on product. Water consumption 60ltr/min @ 5 bar.

Hinged access hoods for ease of maintenance and cleaning.

In feed and out feed solutions also available.

This machine is suitable for the following crops:

Carrots
